Part III DETAILED ACTION

Amendment filed 11/25/02 is acknowledged.

Claims 1-26 remain pending, with claims 1-11, 14-26 being withdrawn from further consideration as being drawn to a non-elected groups. Note that cancellation of claims 1-11, 14-26 has been requested.

In addressing rejections made in the previous Office action, applicant indicates that a Preliminary amendment has been filed concurrently with the filing of this application. A Preliminary amendment which was not addressed in the previous Office action was indeed allocated in the application; this amendment, however, was matched with the application after the Office action had been mailed.

Upon review of the amended claims 12,13, the following additional restriction requirement was deemed necessary. Applicant's response filed 11/25/02 will be addressed subsequent to response to this restriction requirement.

Further Restriction Requirement

Restriction to one of the following inventions, classified in class 707, in general, is required under 35 U.S.C. 121:

II.1 Claim 12, drawn to first method of identifying compounds.

Art Unit: 1631

II.2 Claim 13, drawn to second method of identifying compounds.

The inventions are distinct, each from the other because of the following reasons:

Inventions I-III are related as independent and/or patentably distinct methods. The methods contains specific method steps which are not shared by each other: Group II.2 requires steps of representing each fragment as a "transformation", and including reagent information in "transformation", not required for Group II.1. Further, synthesis rounds in Group II.1 are combinations of fragments, whereas synthesis rounds in Group II. 2 are combinations of links between fragments and reagents. The Groups will be subject to separate art and double-patenting rejections.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 1631

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(h).
